## Rechargeable LED Torch with Adjustable Beam

The Drivetech 4x4 Rechargeable LED Torch is the perfect portable lighting solution - whether that be tracking through the scrub or spending time under the bonnet.

Pumping out 2,000 lumens, this torch is powerful. The bright LEDs give you unmatched visibility, allowing you to see approximately 500 metres. It is housed in a strong aluminium body, giving you a torch that is robust enough to take on any adventure. The battery has a four hour run time and is conveniently charged via USB, allowing you to recharge using battery packs or common 12V chargers.

Featuring an adjustable beam pattern, the torch easily switches between flood beam and spot beam patterns. Along with this, there are 3 different light modes - high, low and flashing - making this one torch versatile enough to suit your diverse camping and working needs.
